

# Dietetic Internship Program

Baylor University Medical Center

## Graduate Degree Program Criteria for Non-Degree Dietetic Internship

Interns are in supervised practice full time during business hours weekly during the fall and spring semesters of the year the intern is accepted in the internship (August-May). The number of hours scheduled in supervised practice will be determined in collaboration with the University with evaluation of the interns' course load and will vary between 30-40 hours each week.
